Vincent Lei

Senior QA Engineer(QA Automation Engineer)

1.Writing Test Cases and Test Plan
2.API Automation Testing
3.UI Automation Testing
4.K6 and Jmeter load Testing,Stress Testing,Performance Testing
5.Jest Integration Testing

New Taipei City, Taiwan

Profile

I am an experienced Automation QA and Senior QA with a strong background in testing and quality assurance. Over the years, I have developed expertise in automation frameworks like Selenium and testing tools like Allure. I am passionate about ensuring high-quality software delivery through efficient and effective testing strategies.

Work Experience

Auto QA Engineer · 亞太滿譽有限公司

Jun 2025 - Present

Build and maintain automated testing services

Write and maintain E2E automated test cases

Design, execute, and maintain E2E automation test cases

Deploy and manage CI/CD pipelines on Jenkins

Build Docker images and deploy customized services

Senior QA Engineer(Test Automation Engineer) · 希格斯資訊科技有限公司

Feb 2024 - Apr 2025

Build frameworks using Pytest, Behave, and K6.

Write automated E2E test cases, functional test cases, and sanity test cases.

Set up a Docker environment for integration.

Use GitLab Runner to establish GitLab CI/CD pipelines.

Configure virtual machine environments and Mock Servers.

Operate Kubernetes and containerized applications.

Perform loading tests, performance testing, and stress testing using K6.

Quality Assurance Engineer(Test Automation Engineer) • Nogle

Jul 2023 - Dec 2023

Writing Test Cases (Test Link) and Test Plan

Testing APIs with Postman and automating the process using JavaScript scripts in conjunction with Node.js to compare data in Redis and SQL.

Codeing Automated Regression Tests for API Scenarios,To achieve the execution of Postman collections and visualize the output using Newman and Jenkins.

Building a sophisticated automated testing tool with the Vite framework

ProxyMan test API and Mock Data

Conducting API Automation Testing with Pytest, including positive and negative test scenarios.

Testing ensures product quality and involves accurate issue reporting.

Develop testing tools and write regression tests with Appium.

QA Engineer(Test Automation Engineer) • 旭盈資訊

Mar 2021 - Jul 2023

Writing Test Cases (XMind) and Test Plans (Jira, ZenTao).

Using Postman to test APIs and automate processes with JavaScript scripts.

Performing packet testing with Charles to record or modify transmitted and received data.

Conducting functionality and stability tests with JMeter, developing test scripts in Java, and storing data in MongoDB.

Simulating user interactions with Selenium WebDriver and generating test reports.

Using Telegram bots for anomaly alerts during regular testing activities.

Maintaining and documenting Appium scripts for mobile application testing.

Collaborating closely with the development team and PM to resolve issues promptly.

Testing and analyzing merchant-related issues, identifying problem areas, and reporting them to the development team for resolution.

Manual Test Engineer · 宙立科技有限公司

Apr 2019 - Mar 2021

Writing test cases using TestLink and generating test reports.

Logging and tracking issues using ZenTao bug reports.

Testing API data with Postman and verifying or mocking API data with Charles.

Assistant Engineer · 開店123科技股份有限公司

Jul 2017 - Feb 2019

Creating UI designs using HTML and CSS (Bootstrap).

Performing regression tests for web and mobile applications.

Maintaining regression test cases.

Education

Apr 2017 - Jan 2020

Chihlee Institute of Technology

Department of Information Management

Skills

- JavaScript,TypeScript
- Python
- Pytest and Behave Framework
- Jest integration API Test
- Jenkins and Gitlab CI/CD
- Jmeter and K6 in Performance Testing
- JIRA Confluence documents
- Docker, AWX, Kubernetes

Language

- English — Intermediate
- Chinese — Native or Bilingual
