

# Lei Vincent

QA Engineer

## Profile

I am Lei Vincent, and the position I aspire to work in is Quality Assurance Engineer. I hope to demonstrate my skills and contribute to the growth of both myself and the company. Currently studying at Chihlee University of Technology, I am majoring in Information Management. During my time at university, besides fulfilling my academic responsibilities and diligently acquiring knowledge, I have also utilized my spare time to gain practical work experience in order to enhance my competitiveness in the future job market.

While I may have less practical experience compared to my seniors, I possess a highly positive attitude and have ambitious aspirations for my future work. I am fueled by an unwavering passion to forge ahead. I will make good use of the experience I have gained in the corporate world and strive for outstanding performance.

I have previously held the position of Quality Assurance Engineer, accumulating a certain level of experience in testing. I have also had some exposure to coding during my development work. I understand the importance of conducting thorough testing on our own products, resolving merchant requirements, and learning how to communicate with others to troubleshoot code-related issues, all while meeting deadlines for submitting required documents.

I am committed to achieving my goals and will work diligently to accomplish anything I set out to do. The role of Quality Assurance Engineer is something I am truly passionate about. If given the opportunity to join your company, I will be dedicated and wholeheartedly complete every task assigned to me.
