雷皓文

崴拓資訊有限公司 | Senior QA Automation Engineer

致理科技大學 | 資訊管理學系 大學畢業

新北市三重區 | 7~8年工作經歷 | 希望職稱：Quality Assurance Engineer、QA Automation Engineer

個人資料	男 、 26歲 、 免役
就業狀態	在職中
主要手機	0978-087-523
E-mail	rock29748870@gmail.com
通訊地址	新北市三重區重新路***
英文姓名	Vincent
聯絡電話	(02)2974-8870
聯絡方式	手機聯絡9:00~21:00
駕駛執照	普通重型機車駕照 、 普通小型車駕照
交通工具	普通重型機車 、 普通小型車

學歷

致理科技大學 2017/9~2021/6

資訊管理學系 | 大學畢業

工作經驗

總年資 **7~8年工作經歷**

Senior QA Automation Engineer

2025/12~仍在職

崴拓資訊有限公司（電腦軟體服務業 30~100人）

軟體工程師 | 台北市信義區

Built end-to-end automation framework from scratch (0→1) using pytest, Playwright, OpenCV, and API testing, covering UI, API, and computer vision-based validation

Designed and maintained automation infrastructure using Jenkins, Docker, and Docker Compose, enabling scalable and consistent test execution

Developed a custom QA backend service using Go (Golang) to support automated testing workflows and data handling
Collaborated with frontend developers to troubleshoot and fix issues in Vue.js-based tools, including debugging internal automation-related APIs

Integrated API testing into automation pipelines, improving regression testing coverage and execution efficiency

Implemented visual validation and UI interaction handling using OpenCV + Playwright for complex game/UI scenarios

Ensured high test reliability through continuous integration, automated reporting, and efficient debugging practices

---

Senior Automation Test Engineer

2025/2~2025/11
10個月

亞太滿譽科技有限公司（電腦系統整合服務業 30~100人）

軟體工程師 | 台北市松山區

Designed, developed, and maintained end-to-end automation test cases covering API and UI workflows for a cryptocurrency exchange platform

Built and managed CI/CD pipelines on Jenkins, automating test execution and reporting across multiple environments

Created and deployed Docker images and customized testing services, streamlining test infrastructure and reducing environment setup time

Maintained automated regression testing services to support continuous release validation and ensure platform stability

---

Senior QA Engineer

希格斯資訊科技有限公司（電腦軟體服務業 30~100人）

其他資訊專業人員 | 新北市新店區

2023/1~2025/2
2年2個月

Built automation test frameworks using Pytest, Behave (BDD), and K6, supporting API, functional, and performance testing across multiple projects

Wrote and maintained automated E2E, functional, and sanity test cases, ensuring comprehensive regression coverage before each release

Performed load testing, performance testing, and stress testing using K6, validating system stability under 2,000+ concurrent users

Set up Docker-based test environments for integration testing, ensuring consistent and reproducible test execution

Established GitLab CI/CD pipelines using GitLab Runner, enabling automated test execution on every merge request

Configured and managed virtual machine environments and Mock Servers to simulate production-like conditions

Operated Kubernetes clusters and managed containerized testing applications for scalable test infrastructure

#功能測試(function test) #Test Scripts #JIRA #CICD #Pytest #JavaScript

Quality Assurance Engineer

2019/3~2022/12
3年10個月

Nogle Taiwan Limited_諾傑股份有限公司（電腦軟體服務業 100~500人）

軟體工程師 | 台北市信義區

Authored and maintained 2000+ test cases (API, UI, and mobile) using TestLink, along with comprehensive test plans covering functional, regression, and stability testing

Designed and executed API tests using Postman with JavaScript automation scripts, including data validation across Redis and SQL databases

Developed automated regression test suites for 500+ API scenarios, integrating Newman with Jenkins to enable continuous testing and daily reporting

Implemented API automation testing using Pytest, covering both positive and negative test cases with structured assertion frameworks

Conducted performance and stability testing using JMeter, developing Java-based test scripts with test data stored in MongoDB

Performed packet-level analysis and network debugging using Charles to capture, inspect, and modify API traffic for issue reproduction

Built and maintained UI automation scripts using Selenium WebDriver, simulating user interactions and generating detailed HTML test reports

Developed and maintained mobile automation testing using Appium, covering core user flows on both iOS and Android

Created internal automation tools using Vite (Vue.js), enhancing testing efficiency and team workflow automation

Implemented real-time anomaly alert systems via Telegram bots to monitor test execution and notify the team of failures

Collaborated closely with developers and PMs to identify, reproduce, and resolve issues efficiently, reducing average bug turnaround time

#JavaScript #Jenkins #Node.js #Git #VueJS

UI/UX QA Engineer

2017/7~2019/2
1年8個月

開店一二三網路科技股份有限公司（網際網路相關業 30~100人）

軟體工程師 | 台北市大安區

Created UI designs and prototypes using HTML and CSS (Bootstrap) to support product development and design reviews

Performed regression testing for web and mobile applications, ensuring consistent user experience across releases

Maintained and updated regression test case documentation to align with evolving product features

求職條件

希望性質 全職工作
上班時段 日班
可上班日 錄取後一週可上班
希望待遇 面議
希望地點 新北市三重區、台北市大同區、台北市中山區、台北市大安區、台北市信義區、台北市內湖區
遠端工作 對遠端工作有意願

希望職稱 Quality Assurance Engineer、QA Automation Engineer
希望職類 測試人員、品管／品保工程師、軟體工程師
工作內容

1. Automation Testing (API, Web UI, Mobile) with Pytest, Selenium, Playwright, and Appium
2. CI/CD Pipeline & Infrastructure (Jenkins, GitLab CI, Docker, Kubernetes)
3. AI-Powered QA Workflow (Claude, ChatGPT) for test generation, documentation, and code review
4. Writing Test Cases (Test Link) and Test Plan

語言能力

英文

聽/中等 | **說/中等** | **讀/中等** | **寫/中等**

TOEIC (多益測驗) 745

台語

略懂

專長

Python、JavaScript、Java

中／英文打字：中文打字50~75、英文打字50~70
影像處理類：Photoshop
程式語言類：Selenium、Appium、Python、JAVA、MySQL、Flutter、HTML、CSS、JavaScript、Vue3
辦公室應用類：Jira、禪道、Outlook、Excel、Word、Powerpoint

#中文打字50~75 #英文打字20~50 #Outlook #Excel #JavaScript #jQuery #HTML #CSS #MySQL #ReactNative

自傳

我是雷皓文（Vincent Lei），擁有超過 8 年的軟體測試與品質保證經驗，專精於自動化測試框架設計與建置。

在職涯中，我從手動測試起步，逐步發展出涵蓋 API、Web UI 及 Mobile 的全方位自動化測試能力。在 Nogle 任職近四年期間，我累計撰寫超過 2,000 條手動測試案例與 500 條自動化測試案例，涵蓋 Postman + Newman、Pytest、Selenium WebDriver、Appium 等多種工具，並整合 Jenkins 實現每日持續測試與報告產出。我同時負責使用 JMeter 進行效能與穩定性測試，並透過 Charles 進行封包分析與問題除錯。期間我還使用 Vite 框架開發內部自動化工具，以及建立 Telegram Bot 異常通報系統，大幅提升團隊測試效率。

在 Higgs 擔任 Senior QA Engineer 期間，我使用 Pytest、Behave（BDD）及 K6 建構自動化測試框架，執行超過 2,000 concurrent users 的壓力測試，並透過 GitLab CI/CD 與 Docker 建立完整的持續整合環境，同時管理 Kubernetes 容器化測試基礎設施。

目前在崴拓資訊，我從零開始（0→1）建立了結合 Pytest、Playwright、OpenCV 與 API 測試的端到端自動化框架，覆蓋超過 150 個測試場景。我使用 Go（Golang）開發 QA 後端服務，並以 Jenkins + Docker Compose 建構自動化基礎設施，實現每日自動化流水線執行。同時，我積極將 AI 工作流融入日常測試流程，運用 Claude、ChatGPT 等工具加速測試案例生成、自動化文件產出與程式碼審查，大幅提升個人與團隊的工作效率。

我擅長分層架構設計（Path / Operation / Service）、Page Object Model、Abstract Factory 等設計模式，致力於打造可維護、可擴展的測試框架。我持續關注 AI 輔助開發與測試的最新趨勢，並熱衷於透過穩健的測試實踐、持續改進與跨團隊協作，交付高品質的軟體產品。

I am Vincent Lei, a Senior QA Automation Engineer with over 8 years of experience in software testing and quality assurance, specializing in building scalable, end-to-end automation frameworks.

My career began in manual testing and has evolved into full-stack test automation covering API, Web UI, and Mobile platforms. During my nearly four years at Nogle, I authored over 2,000 manual test cases and 500 automated test cases spanning Postman + Newman, Pytest, Selenium WebDriver, and Appium, all integrated with Jenkins for continuous daily testing and reporting. I also conducted performance testing with JMeter, performed packet-level debugging with Charles, built internal automation tools with Vite (Vue.js), and implemented a Telegram Bot alert system to monitor test execution in real time.

At Higgs, I built automation frameworks using Pytest, Behave (BDD), and K6, executed stress tests validating system stability under 2,000+ concurrent users, and established a full CI/CD pipeline with GitLab Runner, Docker, and Kubernetes.

Currently at Wit Software, I built a complete automation framework from scratch (0→1) using Pytest, Playwright, OpenCV, and API testing, covering 150+ test scenarios. I developed a custom QA backend service in Go (Golang) and designed the CI/CD infrastructure with Jenkins and Docker Compose for automated daily pipeline execution. I also actively integrate AI-powered workflows — using tools like Claude and ChatGPT — to accelerate test case generation, automate documentation, and streamline code reviews, significantly boosting team productivity.

I am passionate about clean framework design — applying patterns such as layered architecture (Path / Operation / Service), Page Object Model, and Abstract Factory — to build maintainable and extensible test systems. I stay current with emerging trends in AI-assisted development and testing, and I am driven by a commitment to delivering high-quality software through robust testing practices, continuous improvement, and close cross-functional collaboration.
